REVIEW ON THE EDUCATIONAL REPORT FOR 1874—75.

The results exhibited in the Annual Report submitted by the Director of Public Instruction for the year 1874-75 must be regarded as generally satisfactory. The number of Government schools has been increased from 670 in 1873-74 to 699 in the year under report, and the number of pupils in those schools from 20,145 to 23,878. Among the aided schools, 7 have been added, but owing to the withdrawal of grants from two schools, the actual increase in number during the year was 5. The number of pupils in these schools has risen from 7,153 to 7,699. At the close of the year 1874-75, there were therefore 808 Government and aided schools with 31,577 pupils, as compared with 744 schools and 27,298 pupils in the previous year.

Of the 34 new schools, 28 were established at the very close of the year, and the Director of Public Instruction justly infers therefore that the increase in the number of pupils which amounted to 18·5 per cent in Government schools, and 6·7 per cent in aided schools, has occurred among the older schools, owing to the better provision made in respect of teachers.

The unaided schools are reported to have diminished to the number of 200, and though some doubt is felt as to the accuracy of these statistics, it is evident that the measures which have been taken to absorb the village schools into the Hobli school system, and to provide employment for the masters, have produced this result.

Looking to the classification of schools given in para 7, the Offg. Chief Commissioner notices with satisfaction that, out of 670 Government boys' schools, 629 or more than 92 per cent are of the lower class, as shewing that through the medium principally of the Hobli schools, primary education holds a high place in the system pursued in this Province.

The total expenditure incurred from public funds under the several heads of Direction, Inspection and Instruction, amounted to Rs. 2,64,962, of which Rs. 1,92,116 were provided from Provincial funds, and the remainder, *viz.* Rs. 72,846, from Local funds.

On the other hand, the realizations by Government from school fees amounted to Rs. 14,611, proceeds of book sales Rs. 18,004 and the allotment made from Local funds Rs. 96,806. The circumstance that the outlay from Local funds fell short of the assignment made from that source by nearly Rs 24,000, is partly accounted for by the excess in the realizations over the estimate, but not wholly so, and it will be desirable that means should be taken to utilize this balance.

Government Schools—Higher Class Schools.

The proposals referred to in para 24 of the Report, and under which the status of the Bangalore and other principal schools has been raised, having been carried into effect during the year 1875—76, will be noticed in the Report for that year.

Including the Bangalore High School, the schools of this class are 8 in number, and comprise the Raja's School at Mysore, and 6 District Head Quarters' Schools.

The Bangalore High School has fairly maintained its position, and though the average daily attendance has fallen off slightly, there is no diminution in the number of students on the rolls. At the University examinations, this school passed one student for the B. A. degree, 9 for the First Arts examination, and 11 for Matriculation, a result which is creditable to the institution.

Of the other schools in this class, the Raja's School at Mysore, the Hassan, Chitaldroog and Túmkúr Schools receive favorable mention, either for the successful results obtained or for the high standard maintained.

Middle Class Schools.

In this class are comprised 5 Anglo-vernacular schools situated at populous towns, and 38 Vernacular schools (35 Kanarese and 3 Hindustani) at certain taluk head-quarters. The report on the condition of these schools is in general very satisfactory, and the fact that the Vernacular school at Mysore has maintained so many as 204 pupils on its rolls, side by side with the Anglo-vernacular Raja's School, deserves special notice and testifies to the high qualifications of the Head Master.

The rules relating to the institution of a General Test examination for this Province, quoted in para 61 of the Report, have been subsequently placed in abeyance, with a view to their revision in certain particulars.

Lower Class Schools.

The Taluk schools of this class are 67 in number, and are situated at Taluk Kasbas (head-quarters) or other important towns. They comprise 47 Kanarese, 7 Telegu, and 14 Hindustani schools. The condition of the Kanarese schools is not on the whole so satisfactory as would be desired, and the cause is to be found apparently in a want of efficiency or zeal on the part of the masters, the best of which are utilized in the Middle Class schools.

Under the Lower Class schools fall also the Hobli schools, which are now 562 in number, with an aggregate of 15,035 pupils on the rolls, 28 schools of this class were constituted during the year. Eliminating the additional pupils thus contributed, the actual increase in the numbers of the previously existing Hobli schools amounted to about 4,000 or nearly 34 per cent, effected, as the Director remarks, almost entirely by improved arrangements. With the exception of some 200 pupils in the Kolar District, all the students are being instructed in these schools, through the medium of Kanarese.

A fair proportion of the schools are reported on satisfactorily, and the improvement of all will follow upon the arrangements in progress for training the masters. Indeed the development of the system must depend on the supply of well-trained masters, and the means of providing such is necessarily a work of time.

With the object of training additional masters for these schools Normal schools have been instituted during the year, and from the eagerness with which admission to them is sought, the measure promises to be successful. It is an important feature in the arrangement that every inducement is given to the best of the indigenous school-masters to place themselves under training for employment in Hobli schools.

Female Schools.

The number of Government Girls' schools is 9, as in the previous year, but the attendance has risen from 252 to 337. The Director does

not report favorably of the progress of these schools generally, owing chiefly to the masters being selected for other qualifications than a special aptitude for teaching. There are difficulties undoubtedly connected with the maintenance of Girls' schools by Government, and more recently the transfer of one of these schools to the charge of the Local Wesleyan Mission has been recommended, as ensuring better control and supervision of a suitable kind.

Normal Schools.

The schools of this class consist of one Hindustani Normal School at Bangalore, which has 13 students under training and 2 training schools for Hobli school masters.

Special Schools.

The new School of Engineering and Natural Science which was opened on the 1st May 1875, has been instituted with the sanction of the Government of India, in accordance with proposals submitted by the Chief Commissioner Sir Richard Meade. A full account of the objects which this school is intended to serve and its organization is given in paras 79 to 83 of the Director's Report, and it is unnecessary to advert further to the subject. The scheme is professedly an experimental one, but the necessity that must shortly arise for providing trained native officers for the various superior grades of the Public Works, Forest, and Revenue Survey Departments makes it most important that no effort should be spared to ensure its success.

Private Schools aided.

Some interesting particulars are furnished in the Director's Report relative to these schools. There are in all 109 aided schools, of which 77 are boys' schools and 31 girls' schools. Of the boys' schools 39 with 1,738 pupils belong to the lower class, and 38 with 2,994 pupils to the higher and middle classes. These 38 schools receive Government grants-in-aid to the amount of Rs. 22,430, while the 39 lower class schools receive Rs. 6,732. If it may be assumed that the aided schools at Bangalore chiefly provide for education in the more advanced stages, a doubt may be entertained whether the existing

arrangements provide adequately for primary education in that city. The distribution list of these schools given in para 104 of the Report shews that out of the total of 77 boys' schools, 38 are situated in Bangalore.

In connection with the establishment of the Anglo-Indian Aid-Association, the Director points out by figures that but a small per centage of European and Eurasian boys and girls at Bangalore cannot be shewn to be under instruction in schools directly or indirectly connected with Government. It is estimated that there are in Bangalore 1,607 boys and girls of these classes, within the school-going age, and the returns shew that there are 1,376 boys and girls attending schools, and the result gives 30 boys and 201 girls in Bangalore to be accounted for. It may be fairly assumed that the majority of these are under private instruction, but the facts disclosed as to the condition of a large class in the purlieus of the city lead to the inference that the numbers of children of mixed parentage unprovided with instruction are not inconsiderable. The work of the Anglo-Indian Aid-Association, and of other charitable institutions which have recently come into existence, is to search out these children and reclaim them from a mere "street life."

The classification of aided schools according to the language through which instruction is carried on, contained in para 103 of the Report is interesting and suggestive. A similar statement should be furnished in future reports for the sake of comparison.

In the details given as to the progress of the principal schools aided by Government, the satisfactory condition of the Wesleyan Institution, the London Mission Schools, the Roman Catholic Seminary (St. Joseph's), and the Wesleyan School at Mysore, as indicated by increased number of pupils, is favorably noticed. The two chief English schools (Bishop Cotton's and St. Andrew's) have suffered a slight decline, which it is to be hoped is accidental.

The Officiating Chief Commissioner has read with interest the remarks made by Mr. Rice on the defective character of the instruction imparted at the Sanskrit and Hindustani-Persian schools. These schools are isolated, and, as Mr. Rice remarks, the instruction is confined to "the literature, grammar and dialectics of a dead language, while the

scholars are unacquainted with the simplest arithmetical rules and operations." The changes contemplated in the studies pursued at these schools seem therefore most desirable, and it seems a question whether the study of Sanskrit otherwise than as supplementary to an ordinary education can be suitably encouraged by the State.

With one or two exceptions, the Report on the aided schools of the lower class is not favorable. The Offig. Chief Commissioner will look for more satisfactory results from the Bangalore Cantonment Orphanage, the grant to which has lately been increased to Rupees 100 per mensem.

The decrease in the number of private unaided schools has been already adverted to. The number of pupils in attendance at these schools is reported to be 17,056 against 18,914 in the previous year.

The Report furnishes abundant evidence of the care and interest bestowed upon the condition and working of the schools throughout the Province, by Mr. Rice and the Officers of the Department, and the Offg. Chief Commissioner is glad to express his gratification at the results which have been obtained by the labors of all.

"By Order,"

15*th March* 1876.

T. CLARKE,
Offg. Secretary.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION
DATED BANGALORE, 31*st August* 1875.

From

LEWIS RICE, ESQ.,
Director of Public Instruction in Mysore.

To

MAJOR T. CLARKE,
Offg. Secretary to the Chief Commissioner of Mysore.

SIR,

I have the honor to submit the Annual Report on Public Instruction in Mysore, for the year ending 31st March 1875.

New Measures.

2. Besides the attention bestowed on the usual educational operations, which, it will be seen, have resulted in a large increase of the number of pupils under instruction, the following new measures have been instituted during the year under review: the establishment of Normal Schools for the training of additional masters for Hobli Schools, and the opening of a School of Engineering and Natural Science for the purpose of preparing native candidates for the Public Works, Revenue Survey and Forest Departments.

Results for the Year.

3. The year closes with 808 schools and 31,577 pupils connected with the Department, against 774 schools last year containing 27,298 pupils. An addition has thus taken place of 34 schools and 4,279 pupils; but as 28 of the new schools were established only in the last week of the year, this increase of 15·7 per cent in the number of pupils is not due to the opening of fresh schools. On the contrary, it must be accepted as an index of the growth of previously existing institutions following upon a more liberal allowance of teachers, and is in accordance with the results anticipated from that measure in last year's report. Except in 1868—69 when the Hobli Schools were first established, there has been no such increase in the number of pupils under instruction in any year since the formation of the Department.

4. The following figures exhibit the details of the increment thus made to the strength of the schools :—

Details of Increase.

Year..	Government Schools.	Pupils.	Aided Schools.	Pupils.
1874—75 ...	699	23,878	109	7,699
1873—74 ...	670	20,145	104	7,153
Increase.....	29	3,733	5	546

The actual number of fresh grant-in-aid schools was 7, but owing to the withdrawal of grants from 2 which formerly received them, the total number was increased only by 5. The addition to the number of pupils was at the rate of 18·5 per cent in the Government schools, and of 6·7 per cent in the Aided schools.

5. In the unaided schools there has been, according to the returns, a decrease of exactly 200 schools, while the aggregate of pupils remains almost the same. These statistics cannot I think be relied on. However, by adding 1,336, reported to be the number of such schools, with their 18,407 pupils, we obtain a grand total for the Province of 2,144 schools, containing 49,984 pupils.

Schools and Pupils. Grand Total.

6. Discriminating between the sexes, there are 46,842 boys and 3,142 girls, of whom 28,609 of the former and 2,968 of the latter are in Government and Aided schools. According to creed, 26,263 of these are Hindus, 3,338 Muhammadans and 1,976 others. The last item is composed of 660 Europeans, 499 Eurasians and 817 Natives.

Classes of Pupils

7. The subjoined list shews the classification of the schools connected with Government and the attendance at those of each grade. An attempt has been made to exhibit more accurately than in former years the extent of secondary instruction, which from the returns hitherto adopted appeared to be deficient, and on the paucity of which as so represented the Government of India not long ago remarked. But it

Classes of Schools

should be borne in mind that every school of a higher grade includes a very large proportion of teaching corresponding to each of the grades below it.

Class of Schools.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.

Total.....	699	23,878	109	7,699

II. CONTROLLING AGENCIES.

8. *Inspectors.*—Mr. Dunning, Principal of the Raja's School, acted as Inspector of the First Circle until the 21st of August, when he was relieved by Mr. Hodson, who, on his return from sick leave to England, was appointed to the charge of that circle. Mr. Marsden was at the same time confirmed in the appointment of Inspector of the Second Circle. Each of these officers has merited my thanks by a faithful discharge of the important duties devolving upon him. To the energetic inspection of the Second Circle is due much of the advance that has been made during the year in that part of the country.

9. *Deputy Inspector.*—Mr Leonard from the High School acted as Deputy Inspector in the Head-Quarter Circle until 29th July. Mr. Pope was then appointed and held the office for the rest of the year. Their active co-operation has been of great assistance, especially in Bangalore with its many and various schools.

10. *Sub-Deputy Inspectors.*—Several changes occurred among the Sub-Deputy Inspectors, and the experiment was tried of appointing men who had received an English education. Hitherto the places had been filled up, with one exception, from the Vernacular Department, and it was hoped that a superior standard of instruction would be promoted in the Hobli schools by the change. But I regret to say that the expectation has hardly been fulfilled. The wants and circumstances of these primary village schools seem to be better met, other things being equal, by the inspection of well-trained vernacular scholars. The Inspectors agree with me that such men generally accommodate themselves more easily to the rural population among whom they have to move, and perhaps take more interest in their work from not regarding it as derogatory, which those whose chief attention has been directed to the study of English are too apt to do.

11. The following list shews the present staff of Sub-Deputy Inspectors. An additional circle was formed during the year with head-quarters at Sira :—

Name.	District or Charge.	Station.
Srinivasaiengar ...	Bangalore West ...	Bangalore.
Ramacharlu ...	Bangalore-Kolar Junction ...	Devanhalli.
Timmappa ...	Kolar North ...	Sidlagatta.
Shamachari ...	Túmkúr-Hassan Junction ...	Kadaba.
Raghavendra Rao ...	Túmkúr-Chitaldroog Junction	Sira.
Dakshna Múrti Shastri...	Mysore West ..	Mysore.
Krishna Rao, B. A. ...	Mysore-Hassan Junction ...	Talkad-Narsipur.
Lakshmanaiengar ...	Hassan West ...	Hassan.
Srinivas Tatachari ...	Shimoga West ...	Shimoga.
Venkatramanaiya ...	Kadur District ..	Chikmagalur.
Tirumalachari ...	Shimoga-Chitaldroog Junction	Chitaldroog.
Khwaja Muhammad ...	Hindustani Schools ..	Bangalore.
Múrti Rao ...	Training School ...	Devanhalli.
Venkat Narnaiya ...	Do ...	Shimoga.

12. Anantachari, who had charge of the Mysore-Hassan Junction District, it became necessary to reduce. But certain charges brought against him of receiving bribes, investigated by the Deputy Commissioner of Mysore, were not proved. As a whole the Sub-Deputy Inspectors

have worked well. Lakshmanaiengar is reported to have been particularly successful in the Hassan District, and Tirumalachari has done well at Chitaldroog. Múrti Rao has conducted the Training School at Devanhalli satisfactorily. Khwaja Muhammad's services in connection with the Hindustani schools are deserving of mention. Krishna Rao and Raghavendra Rao are new hands. The former has not proved satisfactory.

III. GENERAL FINANCIAL STATISTICS.

Charges.

13. The expenditure for the year on the part of Government amounted to Rs. 2,64,962, which was apportioned according to the statement below. The cost of direction bore a ratio to the whole of 5·6 per cent, and that of inspection of 10·2 per cent. The additional expenditure from private sources in aided schools was Rs. 84,510, and in unaided Rs. 46,677, making up the grand total of Rs. 3,96,149 expended on education from both public and private funds :—

Head of Charge.	Expenditure during 1874—75.	
	From State Funds.	From Local Funds.
Direction with its subsidiary charges ...	14,973	...
Inspection with its subsidiary charges ...	19,464	7,504
Instruction (including all educational expenditure not coming under the above heads) ...	1,57,679	65,342
Total.....	1,92,116	72,846

Receipts.

14. The receipts from all sources paid into Government Treasuries amounted to Rs. 1,79,421, composed of school fees Rs. 14,611, proceeds of book sales Rs. 18,004, and educational share of local fund collections Rs. 96,806. The receipts in aided schools came up to Rs. 79,985, of which school fees contributed Rs. 24,023. The income of unaided schools is set down at Rs. 43,570, the fees having yielded Rs. 43,115. Adding these various items, we derive a total of Rs. 2,52,976, on account of the receipts in all the schools of every description throughout the Province, of which Rs. 81,749 or 32·3 per cent consisted of fees

paid by the pupils. The decrease from last year is entirely confined to the unaided schools; the fees in Government and aided schools shew a good increase.

15. An analysis of the expenditure on instruction in the various grades of Government and aided schools exhibits the following results :—

Analysis of Expenditure.

Description of Schools.	Government.		Aided.	
	From State Funds.	From Local Funds.	From State Funds.	From other Sources.
Boys' Schools. ...				
Higher	48,991	..	12,160	29,379
Middle	23,708	...	10,270	17,754
Lower	20,144	52,818	6,732	10,098
Girls' Schools.				
Higher	...	...	4,040	9,254
Middle	...	...	4,240	3,387
Lower	3,032	...	6,200	1 3,698
Normal Schools ...	1,134	4,987	...	...
Special „ ...	506	...	600	940
Total.....	97,515	57,805	44,242	84,510

The ratio which grants-in-aid bore to the whole Government expenditure for instruction was 19·8 per cent.

16. *Local Funds.*—The actual amount realized was Rs. 96,806, which is Rs. 10,103 in excess of that for the previous year. But the estimate being limited by actuals for the latter period, the expenditure was by direction of the Chief Commissioner kept within the lower sum. As the settlement extends over the country the fund will probably continue to increase.

IV. UNIVERSITY EXAMINATIONS.

17. Of three candidates sent up from the High School to Madras for examination, one obtained the degree of Bachelor of Arts being

Degrees.

placed in the third class. A former student of the London Mission Institution and a B. A. took the degree of Bachelor of Laws.

Branch Examinations.

18. At the First Arts and Matriculation examinations held at Bangalore, there were 30 candidates for the former and 170 for the latter. Out of these, 18 and 45 respectively were successful.

First Examination in Arts.

19. Of the candidates for the First Examination in Arts 24 were students of Government schools, 3 of aided schools, and 3 private students. Of the first 14, and of the second and third 2 each, passed. Of the successful competitors 15 (including 2 Coorgs) were Hindus, 2 Europeans and 1 Eurasian.

20. The following is a list of the schools from which candidates appeared and the results of the examination:—

First Examination in Arts. Schools.	No. of Candidates.			
	Presented.	Passed.		
		I.	II.	Total.
Government.				
High School, Bangalore ...	18	...	9	9
Raja's School, Mysore ...	6	...	5	5
Aided.				
Bishop Cotton's School ...	3	1	1	2
Private Study	3	...	2	2
Total.....	30	1	17	18

Matriculation Examination.

21. There were for Matriculation 69 candidates from Government schools, 73 from aided schools, and 28 from private study. Of the pupils from Government schools 21 were successful, of those from aided schools 23 and of private students one. Of these who passed, 38 were Hindus, and of the remainder, 5 were Europeans and 2 Eurasians.

22. The schools represented are as under :—

Total.....	170	3	42	45

V. GOVERNMENT SCHOOLS.

23. The following table exhibits in the prescribed form the statistics of all the Government schools in Mysore. The number of middle class schools has been increased by the transfer of some which it has been the practice heretofore to put in the lower class, but which for reasons elsewhere stated seemed to have established a well-founded claim to a higher position.

* Eight of these having gone up without permission should properly appear as private students.

Description of Institutions.	Number of Institutions.	Number on the Rolls (monthly average.)	Average Daily attendance.	Total Expenditure.		Fees and Book sales returned to Government.

A. Schools of the Higher Class.

Proposed Changes.

24. Proposals submitted for more accurately defining the position and work of these schools, by separating the collegiate institutions from those which taught only to University Entrance standard, were sanctioned and will come into force in the ensuing year. According to the new arrangements the Bangalore High School will be designated the Central College, the present High School being attached; while the Raja's School at Mysore and the District School at Shimoga will be styled respectively the Raja's High School and the Shimoga High School. These arrangements will provide one superior school for each Division, designed to instruct up to the First Arts' standard. Preparation for degrees will be the distinctive work of the Central College. The Bangalore High School has long been in all but name a college, and the recognition of its status fulfils the intention of its first foundation, while at the same time it establishes a centre into which may be systematically collected from various parts of the country all the candidates for the most advanced instruction. By a uniform and, in some schools, higher rate of fees, it is estimated that the additional cost of these arrangements will be fully met by the returns from the schools themselves.

High School, Bangalore.

25. The High School continued in the hands of Mr. Pope until the 21st of July, when Mr. Waters, the Principal, having returned from sick leave to England, resumed charge. Mr. Leonard, acting as Deputy Inspector, at the same time returned to the school and was promoted to the First Assistant's place. Soon after, Mr. King, who had been temporarily in charge of the Hassan District School, came back and was appointed Second Assistant.

26. The number of students shews a slight increase over last year, being 574 against 566. The average daily attendance on the other hand has fallen from 523 to 481. The pupils consist of 524 Hindus, 24 Muhammadans, and 26 others, of whom 18 are Europeans and Eurasians. The amount of fees realized has been much higher than last year, producing a total of Rs. 5,422 against Rs. 4,740. The attendance last year was evidently increased at the expense of the fees, boys being either excused payment or admitted at reduced rates. Such a course was unauthorized, and shewed a laxity to which there are doubtless many inducements everywhere, but which is in the long run prejudicial to the interests of the schools. The rates imposed are moderate, but it is needless to say that unless strictly enforced every effort will be made to escape payment.

27. At the University examinations the school passed one student for the B. A. degree, 9 for the First Arts examination and 11 for Matriculation. The results of the annual examination of the school by means of papers, set by various gentlemen engaged in education in the south of India, have not been received in this office. But the thanks of the Department are tendered to all who obligingly assisted on the occasion.

28. The conduct of the students is reported to have been with a few exceptions satisfactory. The moral influence of some of the senior students has been good. The loss sustained in the death of one of the most promising is much lamented both by the masters and by his school fellows. One college student, a Coorg, left this country to prosecute his studies in England, the pioneer of his race in this movement.

29. The library has been well used by the senior students so far as the books had reference to examination. This is a good feature, as native youths are prone to trust for all explanation of difficulties to their

teacher. It is to be desired that they might shew a greater desire for knowledge which does not directly tend to passing examinations.

30. The Principal remarks that "those who do hereafter join the College classes should be prepared to complete the university four-years' course, or not attempt at all. Many resort to the bad practice of seeking employment as soon as the Entrance examination has been passed, and yet striving to pass more examinations. This is detrimental to themselves, and lowers the character of the institution to which they belong. Many a poor student must however adopt this course until native liberality provides for such cases. But for founders and benefactors in our English seats of learning, the world would have lost much both in Literature and Science."

Sports.

31. The United Schools Athletic Sports were held as usual in the High School grounds, and passed off with great success. The Challenge Cup was this year won by a Muhammadan, a student of the High School. Mr. Wellesley was kind enough to offer some additional liberal prizes for handicap races, which were eagerly contested by winners in the previous events.

Raja's School, Mysore.

32. The *Raja's School,* during the employment of Mr. Dunning, the Principal, in inspection work, or from 20th March to 21st August, was conducted by Mr. Haldwell, Head Master of the Hassan District School. Two pupil teachers were appointed early in the year to each of the three branches, a measure which has proved beneficial to the junior classes. The number of pupils on the roll at the close of the year in all departments* was 514, against 509 last year. These consisted of 282 Brahmans, 157 other Hindus, 70 Muhammadans, and 5 Anglo-Indians. It is found that 128 are sons of persons in Government service, 103 of persons in the Palace service and 283 of private individuals. The total amount of fees realized was Rs 2,372—14—0, against Rs. 2,110—2—0 last year.

*English...	...	250
Kanarese...	...	204
Hindustani	...	60

33. Out of 6 students sent up for the First Examination in Arts 5 were successful, all passing well, though in the second class. The candi-

dates for Matriculation were less fortunate, only 2 having succeeded out of 11. The failures were chiefly in the vernacular languages, namely six in Kanarese and one in Tamil. It is to be hoped this will not occur again.

34. In the lower English school, the work done was satisfactory, except in the class next below the Matriculation, in which the boys had not been well prepared and consequently very few were found fit for promotion. After a strict examination several were rejected with the view to have them better prepared in future. All the other lower classes in the English school were found to have a fair proportion of boys fit for promotion to the next higher class.

35. The thanks of the Department are due to the various gentlemen who obligingly set examination papers for the students of the upper classes. Also to the donors of special prizes, namely, one for English in the Matriculation class by Mr. Ramaswami Iyer, Pleader ; one for Indian History in the same class by Mr. Narsimmaiengar, Tutor to His Highness the Maharaja ; and two in the Hindustani school by Mr. Mahomed Ali, Assistant Commissioner.

36. Of the holders of the five Government merit-scholarships, two passed their F. A., and one of the two has lately been appointed Head Master of the Jaghirdar's School at Yelandur. One was found unfit to go up for the F. A. examination at the end of the two years' course and consequently forfeits his scholarship. The other two had studied only one year each of their course, one for the B. A., and the other for the F. A. and did not go up.

37. The holder of Colonel Malleson's scholarship of Rs. 7½ also went up for his F. A., and passed. Generally the holders of the scholarships have, except in two instances, justified the encouragement extended to them.

38. Various athletic exercises were regularly practised for several months, and on the 10th of March, a public gathering, similar to the one in Bangalore, was for the first time held for the exhibition of sports, which appear to have excited much interest. Prizes were provided for the successful competitors by the liberality of the European and Native gentlemen of the station.

39. *District Schools.*—The *Shimoga* School, which had done so well of late at the Matriculation examination, was unfortunately this year conspicuous for its failures, as of seven candidates sent up not one passed. It is believed that some irregularities have been prejudicial to the work of the Head Master. At the inspection Kanarese was found to be imperfectly studied in the first three classes, but the third and fourth classes answered remarkably well in English. The order and regularity in these two classes and the style in which answers were given were very pleasing. The masters of both are former students of the school. An additional teacher was appointed during the year.

Túmkúr	139	82	63
Kolar	85	66	52
Chikmagalur ...	110	27	55

40. The play-ground having been levelled and turfed by a gang of convicts from the jail, kindly placed at disposal by Mr. Ricketts, Officiating Commissioner of the Nagar Division, the cricket club was agan started and games are now played every week.

41. The *Hassan* School, during the absence of Mr. Haldwell on duty at Mysore as Acting Principal of the Raja's School, was conducted by Mr. King from the High School. He had charge from 20th March to 25th August. Out of 12 students sent up for Matriculation 6 passed. With the proficiency of the lower classes the Inspector was much pleased. "The general efficiency of the institution 'he remarks' was never better than it is at present, and its popularity is evinced by the number of boys from a distance who came to Hassan for the sake of attending Mr. Haldwell's School."

42. The *Chitaldroog* School has for ten months of the year been in charge of Mr. Coleman, and under him has made steady progress. Two students were sent up for Matriculation, of whom one passed. The various classes did fairly at the inspection. Geometry was found to be a weak subject as before, but considerable improvement had been made. The proportion of pupils passed in all subjects was 48 per cent.

43. The *Túmkúr* School, since Mr. Clapham from Chitaldroog took charge in June, has increased 30 per cent in numbers. The instruction

in the school generally was not satisfactory when inspected in July, but a great improvement will doubtless be apparent when the present Head Master has had sufficient time to put matters right. Three candidates sent for Matriculation failed. This school will probably never reach a very high figure owing to its proximity to Bangalore, whither the best boys naturally go for instruction.

44. The *Kolar* School was entrusted to Mr. Birch from Túmkúr. I trust that he may effect all the improvement that is needed. The two highest classes were in poor condition at the inspection, and the assistant masters, though working tolerably well, had used but small efforts to make themselves more efficient.

45. The *Chikmagalur* School, raised to the grade of a District School on the appointment of Mr. Venkatpataiengar from Chikballapur, has under him made a very marked advance. The attendance has risen from 40 to 110, and the school for the first time finds a place in the University list, one student having passed out of four sent up. With the strengthening of the staff of assistants, which has become imperatively necessary, this school, so long unsatisfactory, will, it is expected, take up a creditable position among the schools of the higher class.

B. Schools of the Middle Class.

1. *Anglo-Vernacular Schools.*

46. *Taluk Anglo-Vernacular Schools.*—On the transfer of the former Head Master to Chikmagalur, Mr. Wright from Húnsúr was placed in charge of the *Chikballapur* School. Under him the number of pupils has increased. There was a general failure at the inspection in Kanarese, but the results of the examination in the other subjects all through the school were fair. The assistant masters are all well reported on, especially Nadamuni Naidu.

Schools.	Pupils.
Chikballapur ...	86
Channapatna ...	31
Húnsúr	40
Hole Narsipur ...	34
Gundlupet	27

47. In the *Channapatna* School both masters have worked well and a decided advance has been made during the year. In the highest class (a third) the language lessons had been well studied. The class did well in reading and explaining the meaning of the English lessons, in parsing and analysis of sentences. In Kanarese poetry the stanzas selected were paraphrased in Kanarese, and English equivalents for many of the words and phrases were readily and accurately given. The mathematical work had been fairly done.

48. The *Húnsúr* School makes tolerable progress, but might do much better. A new school house is in course of erection, and with the better accommodation thus available, improvement will doubtless take place in the general condition of the school.

49. The *Hole Narsipur* School has improved and acquitted itself well in every subject except history and translation. The failure in the latter was due quite as much to imperfect knowledge of Kanarese as of English, and special attention will have to be directed to this subject by both teachers and pupils, as well as to correctness of accent and emphasis in reading. The little boys of the fourth class were an exception to the rest in the readiness with which they translated easy sentences.

50. The *Gundlupet* School has a good master, but he labours under difficulties from want of proper school premises, and requires an assistant. One has since been appointed.

2. *Taluk Vernacular Schools.*

51. It has hitherto been the practice to consign all the vernacular schools to the Lower class. But as this tends to convey a false impression of the graduation of schools in Mysore, and left scarcely any to be included in the middle class, it has been deemed necessary to introduce a change. Hence those Vernacular schools which have long emerged from the primary stage, and made good a position entitling them to be regarded as secondary schools, have in the present report been entered as of the middle class.

52. The number thus returned consists of 35 Kanarese and 3 Hindustani Schools, whose distribution will be gathered from the marginal table, shewing the proportion in each District, and the total attendance.

District.	Schools.	Pupils.
Bangalore ...	7	488
Kolar ...	3	154
Túmkúr ...	5	441
Mysore ...	7	587
Hassan ...	3	184
Shimoga ...	7	533
Kadur ...	2	154
Chitaldroog ...	4	284

53. Of the schools in the Bangalore District the largest is the one at Dodballapur, with 157 pupils. But the most advanced is the Kankanhalli School, which owing to an epidemic in the town has been unfortunately reduced to half its former strength. The Nelamangala, Yelahanka and Sarjapur Schools are well reported on.

54. In the Kolar District the Hindustani Schools at Kolar and Chikballapur are both doing very well. A great improvement has been made in the Kanarese School at Sidlagatta, but more energy is required on the part of the masters.

55. In Túmkúr District the Koratagere and Maddagiri Schools are the best attended, having over 100 pupils each. In addition to this the Koratagere School is reported as almost the leading institution of its class in the Second Circle. The Chiknayakanhalli School is in a good and efficient state.

56. The Mysore School, with 204 pupils, stands foremost among the vernacular schools in attendance. It is gratifying to record that it occupies an equally prominent position in point of instruction, and reflects

much credit on Mallappa, the able Head Master. The Chamrájnagar, Seringapatam, Yedatore and Malvalli Schools are all very satisfactory, and doing thoroughly good work. The Nanjangúd School has not kept up its standard well. In contrast to the Kanarese schools, I regret to say that the Hindustani school at Mysore is very far from satisfactory and the attendance most irregular.

57. Of the schools of the Hassan District, those at Belur and Hole-Narsipur are satisfactory. The Hassan School is reported to have made great strides during the year.

58. The Shimoga District contains in the Hole-Honnur School, with 100 boys, one of the most uniformly satisfactory and progressive of the Taluk Vernacular schools. It is the best in the Second Circle. The Nyamti School, though not so well attended as formerly, is described as satisfactory, as also are the schools at Ságar, Shikarpur and Shimoga.

59. The Tarikere and Yedehalli Schools in Kadur are both good schools and making steady progress.

60. In Chitaldroog District, the Hosdurga and Pavagada Schools are the best, and doing well, especially the former. The Davangere and Harihar Schools, situated in large and populous towns, have made a decided improvement during the year, and will, it is hoped, make good the footing they have attained.

61. In connection with the Middle Class schools the following rules published on the 4th of March, instituting a General Test Examination for Mysore, may be quoted.

"From and after 1st April 1876, no person not being a matriculated student of any University, or not having passed the Madras General Test, or who has not been continuously employed in the public service since January 1st, 1860,* shall be appointed to any situation under the Mysore Government, the salary of which may exceed Rs. 20 a month, without having passed a satisfactory examination in the following subjects, *viz* :—

* These rules do not apply in the case of purely Military appointments, or to persons belonging to regular establishments of peons, or to Police Officers who have passed the Police Test.

(*a.*) Hand-writing, including the ability to copy within a prescribed time and in a good clear hand a manuscript or printed paper.

(*b.*) Orthography, to include writing from dictation and correctly re-writing a mis-spelt passage.

(*c.*) Composition and Grammar, including ability to write a simple letter in good grammatical language; to correct a passage written in un-grammatical style, and to answer questions on Grammar.

(*d.*) Arithmetic, the first four Rules, Simple and Compound; Vulgar and Decimal Fractions, and questions involving the Rule of Three.*

(*e.*) Geography, including the elements of General Geography, and a somewhat more accurate knowledge of Geography of India and of Mysore in particular.

(*f.*) History, including a knowledge of the leading facts of the History of India and of Mysore in particular.

The examination will be divided into two branches, English and Kanarese. Candidates for employment in an appointment the duties of which require a knowledge of English will be required to execute the test in Hand-writing, Orthography, Composition and Grammar in the English language. All candidates will be required to perform the test in Arithmetic, Geography and History in Kanarese.

The examinations provided for in these rules shall be conducted by means of printed papers. They shall be open to all candidates whose age exceeds 17 years on the 1st of October of the year in which the examination is held.

The examination will be held annually in the month of November, at the undermentioned places :—

Bangalore. | Mysore. | Shimoga.

A fee of Rs. 4 will be required from all candidates. This fee will be paid by each candidate into a Taluk Treasury, and the Amildar will grant him a receipt.

* The Kanarese paper in this subject should be executed in English figures.

All applications from candidates desirous of appearing at the above mentioned examinations must be addressed to the Director of Public Instruction, Bangalore, in time to reach him not later than October 1st. Each application must be accompanied by the following certificates:—

(1.) A certificate from a Civil Surgeon, that the applicant is of sound bodily health and free from constitutional infirmity unfitting him for the service of Government.

(2.) A certificate from an Amildar that the applicant has paid the prescribed fee of 4 Rs. into the Taluk Treasury.

(3.) Evidence that the applicant will be more than 17 years of age on the 1st October of the year in which the examination is held.

The Chief Commissioner reserves to himself the power of exempting any candidate for Government employment from the necessity of passing the test; but such exemptions will only be granted in very special cases."

C. Schools of the Lower Class.

1. *Taluk Schools.*

62. The Taluk Schools of the Lower Class number 67, of which 46 are Kanarese, 7 Telugu, and 14 Hindustani. The statement in the margin will serve as a guide to the number and strength of those in each District. With one exception the Telugu schools are all in the Kolar District.

District.	Schools.		Pupils.
	Kanarese or Telugu.	Hindustani.	
Bangalore ...	5	3	351
Kolar ...	16	2	774

Mysore ...	6	3	368
Hassan ...	7	1	191
Shimoga ...	3	1	226
Kadur ...	6	1	350
Chitaldroog ...	6	1	291

63. *Kanarese Schools.*—The poor school at Alur was given up on the breaking up of the Maharajdurga Taluk, and the Huliyurdurga School for a similar reason converted into a hobli school. The following schools may be described as more or less satisfactory—Channapatna, Bagepalli, Chikballapur, Mulbagal, Sorab and Sakrepatna. Several others are improving, but much remains to be done before the majority reach the standard aimed at in these schools. There are not more perhaps than half a dozen which could not with proper exertion and arrangements secure an attendance of 100 boys, and have classes as high as a second. The attention of the Inspectors will be specially directed to this matter, with the view of achieving these results. But it will not be possible unless there is an active spirit in the masters, above being content with a minimum of labor.

64. *Telugu Schools.*—The Mulbagal School is much the best of these. The Chikballapur School is also doing well. The remainder stand in need of improvement.

65. *Hindustani Schools.*—The following are favorably reported of,—Mulbagal, Sarjapur, Sidlagatta and Chikmagalur. These are all popular and well conducted institutions. The Head Masters of the last three were trained in the Normal School at Bangalore.

1,546	0—10—0	2,048	723	22	2,793

2. *Hobli Schools.*

66. These primary schools now number 562 with 15,035 pupils, against 534 with 11,983 pupils last year. The 28 additional schools, as explained in a previous part of the report, were established only in the last week of the year, and do not therefore contribute more than about 300 towards the total. We have thus the gratifying result to record of an increase of 4,052 pupils for the year, or nearly 34 per cent, effected almost entirely by improved arrangements in the formerly existing schools.

67. The average number of pupils for each school has thus been raised to 27. This is more than double the average attendance of the indigenous schools. But the actual strength of individual Hobli schools is in numerous cases very much higher than the average. The largest is at Melkote, where there are 146 pupils, including 45 girls. The next is the Tyamagondal School, with 100. Holalkere and Kudúr have over 80, Kalale over 70; Ajjampur, Bidadi, Bagur, Channaraypatna, Dodbele, Honnali, Kubbattur, Lakkur, Masti, Talya, Urdagere and Vastara over 60. Besides these there are 26 schools with over 50 pupils each.

68. The distribution of the schools is as given in the margin. Of the whole number of pupils 14,189 are Hindus, 772 Muhammadans and 74 others. Distinguishing between the sexes 14,888 are boys and 147 girls. The former number includes 41 adult night students. The medium of instruction in all the schools is Kanarese, but 200 of the pupils, principally in the Kolar District, learn Telugu.

District.	Schools.	Pupils.	Average.
Bangalore ...	86	2,403	28
Kolar ...	95	2,329	24
Túmkúr ...	61	1,734	28
Mysore ...	91	2,432	26
Hassan ...	77	1,854	24
Shimoga ...	56	1,584	28
Kadur ...	45	1,178	26
Chitaldroog ...	51	1,521	30

69. The progress of the schools may be judged from the classes which have been formed. There are thus 28 schools with a first class, while 202 have a second class as the highest, and 248 a third class. As regards the condition of the schools, the Inspectors report 23 as *very good*, 146 as *good*, and 214 as *fair*; the rest are not satisfactory. We thus gather that 230 schools, or about two-fifths of the whole number, have pupils advanced beyond the elementary stage; that 68 per cent are doing generally well, 30 per cent very well. Arrangements for the additional training of such masters as require it will probably result in improving the standard of those schools which have not yet attained to a satisfactory condition.

70. A number of new schools of this class will be opened during the ensuing year, the masters for which have been under training at Devanhalli and Shimoga. Applications for the establishment of such schools are of almost daily occurrence, and there is no doubt that the people as a whole appreciate the instruction imparted, which, elementary though it be, is yet superior to what was commonly obtainable in the formerly existing indigenous schools. But even that consideration would probably not have sufficed to invest the hobli schools with the popularity they enjoy, had they not been established on the basis of the old country schools, and to a great extent under masters who had previously secured the confidence of their respective neighbourhoods. With faithful and intelligent inspection, and a due allowance of assistants, I look to see an average before long of 50 pupils to each hobli school.

D. Female Schools.

71. The number of Girls' schools continues the same as reported last year, but the attendance has risen from 252 to 337. The details for each District are as given in the margin. The pupils include 334 Hindus and 3 Muhammadans. All are taught Kanarese, except 28 at Chintamani, learning Telugu.

District.	Schools.	Pupils.
Bangalore ...	4	160
Kolar ...	4	131
Hassan ...	1	46

72. The schools at Hassan, Chintamani and Closepet appear to be doing well. The others are fair, with the exception of those at Magadi and Shrinivaspur, which are in very poor condition. It is difficult to estimate the utility of these schools. They fluctuate much, both in attendance and progress. The indications of steady growth and advance are rare. The masters are generally men without training, selected by the people as respectable and fully arrived at years of discretion rather than for any special aptitude for the work, which in general opinion requires very little.

73. Applications continue to be received occasionally for new schools, and there is unquestionably a disposition springing up in favor

of female education. It has already been stated that 147 girls attend the hobli schools. There are, besides, 20 in the taluk schools.

E. Normal Schools.

Hindustani Normal School, Bangalore.

74. This school continued to carry on the work of preparing teachers for the Hindustani schools as in former years. The number of students under training is 13. It is desired to get men from other parts of the country than Bangalore, as those born and brought up here have been found unable to stand the climate of the western Districts

Training Schools for Hobli Masters.

75. Two Normal Schools for the training of hobli school masters were opened at the beginning of the year, one at Devanhalli for the Nundydroog Division, and the other at Shimoga for the Nagar Division.

76. *Devanhalli.*—At the former place upwards of 600 candidates presented themselves for admission. It was impossible to make provision for any thing like this number, which exceeded that of all the hobli schools put together. After a careful examination of each man's claims and qualifications, 60 were selected for training. They continued under instruction in the various books used in hobli schools, and had regular

practice in giving lessons to a class, up to March, when a final examination was held. Of the 53 students who appeared for examination, 28 were granted certificates of qualification and appointed to the charge of schools. The remaining 25 are still under training.

77. *Shimoga.*—This training school was opened in May with 32 students, who went through a course similar to that adopted at Devanhalli. The final examination was not held within the official year but shortly after its close, resulting in the passing of 29. Some of these would have profited by longer study, but the demand for teachers in the Nagar Division being much in excess of the supply, the men were all provided with appointments.

F. Other Schools for Special Education.

78. As intimated in last year's report, arrangements of a more satisfactory character than had previously existed were under consideration as regards the means of instruction in civil engineering.

School of Engineering and Natural Science.

79. The correspondence on this question dates as far back as September 1873, when the Government of India called for a report as to the training that could be locally provided for subordinates of the Forest Department. The proposals for meeting this demand gradually took shape in a scheme for a School of Engineering and Natural Science, to be placed under a competent Engineer Officer as Principal, and attached to the High School, Bangalore, as a branch. The design of the institution was extended so as to embrace the preparation of candidates for both the upper and subordinate grades of the Public Works, Revenue Survey and Forest Departments.

80. The following Notification published on the 20th November states the conditions of admission and the course of studies.

No. 1940, P., dated 4th September 1874.

"With the sanction of His Excellency the Governor General in Council, conveyed in the despatch noted in the margin, a school for the education of natives for the Departments of (1) Public Works, (2) Revenue Survey and Settlement, and (3) Forests, will be established in connection with the Bangalore High School, on or about the 1st of April 1875, under the designation of the "School of Engineering and Natural Science." The school will consist of two departments, termed Upper and Lower Divisions, designed respectively to furnish employés for the Upper and Subordinate Establishments of the Departments referred to above. The selection of candidates for nomination to the Upper and Lower Divisions of the school respectively will be made annually in the month of March, under the orders of the Chief Commissioner, and will be restricted to youths of not less than 17 or more than 22 years of age, of good health and physique, (as certified by competent medical authority,) of active habits and who are prepared to serve in any part of the Province of Mysore.

All candidates for the Upper Division of the school must previously to nomination have passed the University "First-in-Arts" Examination. Those for the Lower Division, who are intended to fill grades corresponding with the present Upper Subordinate Establishment of the Public Works Department, must similarly have passed the University "Matri-

culation" Examination. Candidates for employment in the grades corresponding with the present Lower Subordinate Establishment of the Department Public Works will be subjected to an entrance examination in Arithmetic, Kanarese and English.

If the number of approved candidates for either division of the school is in excess of the number required, the Chief Commissioner may, at his discretion, direct that selection be governed by a competitive examination in Mathematics, English and Kanarese.

Nominations will be made in the first instance without reference to the special department of the public service to which the pupils will ultimately be appointed. The first half of the course prescribed for both divisions will be occupied with such subjects as are common to the requirements of all three departments of the service. At the conclusion of the first half of the course, the students will be allotted to the several departments of the service, selection being made as far as possible with reference to the aptitude and inclination of each student. Thenceforth the education of the students will be conducted with reference to the special requirements of the department of the service to which they are assigned.

An engagement will be taken from all candidates previously to final nomination, binding themselves with two securities in the sum of Rs. 2,000 for the Upper and Rs. 500 for the Lower Department, to serve the Mysore State, if required, in the Department to which they may be ultimately assigned, in any part of the Province to which they may be sent, for a term of not less than five years from the date of their final admission to the service.

The course of instruction in the Upper Division for pupils under training for the superior grades of the departments specified in the 1st para of this order will ordinarily occupy three years. The term may be abridged in the case of any student who is able to complete the course in a less period.

The fee for pupils while under instruction in this division is fixed at Rs. 15 per mensem, payable quarterly in advance, and they will provide their own books, instruments, &c.

The course of instruction for students in the Upper Division will embrace the following subjects :—

I. Mathematics.
II. Natural Philosophy.
III. Mensuration and Estimate making.
IV. Surveying and Levelling.
V. Constructive Engineering.
VI. Architectural and Topographical drawing.
VII. Natural science, including Botany and Vegetable Physiology, Chemistry, Geology and Meteorology (for candidates for the Revenue Survey and Forest Departments.)

The course of instruction in the Lower Division will ordinarily occupy two years, but the term may be abridged as in the case of the Upper Form.

Students while under training in this division will receive from Government a monthly allowance of Rs. 8 per mensem, during the first year, and Rs. 12 per mensem, during the second year of the course, provided that no student shall be advanced to the higher scale of pay whose conduct and progress do not in the opinion of the Principal entitle him thereto. Students in the Lower Division will be required to find their own books and instruments.

The course for the Lower Division will embrace the following subjects :—

I. Mathematics.
II. Surveying and Levelling.
III. Engineering.
IV. Drawing and Estimating.
V. Account and Book-keeping.
VI. Elements of Botany and Vegetable Physiology, Chemistry and Geology (for candidates for the Revenue Survey and Forest Departments.

The course for candidates for the Lower Subordinate Establishment will be less difficult in degree than that to which candidates for the Upper Subordinate Establishment will be subjected. Quarterly examinations will be held to test the progress of the students in both divisions, and any student who fails to satisfy the examiner at such examinations, or who is considered unlikely to attain the required proficiency within the period prescribed for the course, will be reported, in view to his removal from the school, in which case he will forfeit his claim to an appointment under Government. Cases of marked misconduct on the part of any pupil will be similarly reported with the same object.

At the close of the course a final examination will be held, designed to test the general proficiency of the students in each division of the school. Seniority in the several grades and departments will be determined by the result of this examination.

Those students who pass will join the departments to which they are assigned, in the order of their passing, on probation for one year, at the end of which period, if they give satisfaction, they will be confirmed and will thereafter be fully eligible for promotion. The appointments in the several departments of the Mysore service, for promotion to which in due course passed students will be eligible on the satisfactory completion of their term of probation, are as follows:—

UPPER DEPARTMENT.

Public Works.	Forests.	Revenue Survey and Settlement.
Chief Engineer (1st, 2nd and 3rd class) ...	Conservator (1st, 2nd and 3rd class) ...	Superintendent (1st and 2nd class)
Superintending Engineer (1st class, 1st and 2nd grades.)	Deputy Conservator (1st, 2nd and 3rd class) ...	Deputy Superintendent.
Superintending Engineer (2nd class, 1st and 2nd grades) ...	Assistant Conservator (1st, 2nd and 3rd class)...	Assistant Superintendents (1st, 2nd, 3rd and 4th class)
Executive Engineer (1st, 2nd, 3rd, and 4th grades)		
Assistant Engineer (1st, 2nd, and 3rd grades) ...		

LOWER DEPARTMENT.

Upper Subordinate Establishment.

Public Works.	Forests.	* Revenue Survey and Settlement.
Sub-Engineer (1st, 2nd and 3rd grades) Supervisor (1st and 2nd grades) Overseer (1st, 2nd and 3rd grades)	Rangers (1st, 2nd and 3rd class)	

Lower Subordinate Establishment.

Public Works.	* Forests.	* Revenue Survey and Settlement.
Sub-Overseer (1st, 2nd and 3rd grades)		

The object of the school is, as already stated, the education of candidates for certain specified departments of the Mysore Government service. It is hoped however that in process of time the sphere of its usefulness may be extended, that private pupils may be induced to enter upon the course, or a part of it, and that candidates for appointments in the General and Revenue Departments will avail themselves of the special training provided by the institution.

Due notice will be given hereafter of any arrangements which may be made for enlarging the scope of the school and rendering it available for the general public."

81. For the Principal-ship of the School of Engineering and Natural Science the services of Mr. Gramatzki, Assistant Engineer of the First Grade, were placed at disposal. At the same time Mr. Subba Rayar, a graduate of Madras. in Arts and Civil Engineering, was appointed as Assistant Master.

* As there are at present no Upper and Lower Establishments corresponding with those in the Department Public Works in the Revenue Survey Department, and no Lower Subordinate Establishment in the Forest Department, no candidates for the appointments in question can for the present be received in the school.

82. In order to provide lectures on Botany, Chemistry, Agriculture and kindred subjects, arrangements were entered into with Mr. Harman of the Royal Agricultural College, Cirencester, who had been engaged as Superintendent of the Experimental Farm.

83. The number of candidates nominated for admission was 9 to the Upper Division and 12 to the Lower. Of the former 5 were intended for the Public Works Department, 2 for the Forest Department and 2 for the Revenue Survey. Of the latter 10 were assigned to Public Works and 2 to Forests.

84. It is to be hoped that the institution started on this prosperous footing will fulfil the expectation of Government in its establishment, and be the means of training up a body of skilled professional men who will be a credit to the country.

Jail Schools.

85. The convicts under instruction at Bangalore, Mysore and Shimoga, numbered 767, as per details in the margin. Of this number 735 were men, 10 boys and 22 women. The women and juveniles are in the Central Jail, Bangalore.

Jail at—	Convicts under instruction.
Bangalore ...	403
Mysore ...	221
Shimoga ..	143

86. *Central Jail, Bangalore.*—Regarding the system pursued in this institution, Dr. Henderson, the Superintendent, has favored me with the following memorandum. A full description has appeared in previous reports.

"Education in the Central Jail has been carried on in the same method as before explained (among male convicts, women and juveniles) and has fair success. Attendance is compulsory on all not otherwise employed, but of course the progress made must depend upon circumstances.

Misconduct or requirements of work interfere occasionally with this, but among those who have been able to give regular attendance and attention the advancement is very marked.

The numbers in the various classes on the 31st December 1874 were :—

First or lowest class	119
Second	73
Third	65
Fourth	27
Fifth and Sixth	26
English (for Press employ) ..	22
Women	20
Juveniles	11
	363

This is less than former years, but comes from various legitimate causes.

Of those released during the year 1863 had learned to read and write in jail. Among the women the acquirement of these useful arts is but slow. The juveniles are as a rule quick and apt.

On Sundays, books are given out to such as can read. The schools and classes have been very well looked after by the School Master P. Mutaiya and by the School Mistress Abigail."

The Police.

87. Besides the instruction in the elements of knowledge thus imparted to members of the criminal classes in confinement, special arrangements were made, on the requisition of the Deputy Inspector General of Police, for teaching reading and writing to such of the police constables throughout the country as were ignorant of these arts. A considerable number have thus attended for a time in the Taluk and Hobli schools during the intervals of duty and taken the first steps in the acquisition of knowledge.

VI. PRIVATE INSTITUTIONS UNDER GOVERNMENT INSPECTION.

88. The schools receiving grants-in-aid from Government may be classified as in the following statement, which also gives the attendance and other particulars. As with the Government schools, and for similar reasons, several previously included in the lower class have been added to the middle class.

Class of Schools.	Number of Institutions.	Number of Pupils on the Rolls, Monthly Average.	Average Daily Attendance.	Grants-in-aid given by Government.	Expenditure from all sources other than Grants-in-aid given by Government.	Fees.
Boys' Schools.						
Higher Class. ...	6	997	897	12,160	29,379	10,382
Middle „ ...	32	1,997	1,718	10,270	17,754	3,279
Lower „ ...	39	1,738	1,496	6,732	10,098	899
Girls' Schools						
Higher Class ...	3	355	347	4,040	9,254	6,230
Middle „ ...	9	616	507	4,240	3,387	1,539
Lower „ ...	19	1,206	1,044	6,200	13,698	699
Normal Schools ...	...	...	...	...	...	...
Other Schools for Special Education	1	65	65	600	940	995
Total.....	109	6,974	6,074	44,242	84,510	24,023

89. The new grants made during the year were as stated below:—

	Rs.
Boys'—London Mission School, Málur ..	20
Sanskrit School, Kadaba	15
Do Molur	10
Hindustani School, Bail Narsapur ..	10
Do Hosalaya	10
Girls'—Saint Bartholomew's School, Mysore ..	40
Wesleyan Girls' School, Siddi Katte ..	20

90. In addition to these monthly grants for education, the following were given in aid of buildings:—

Wesleyan Girls' School, Siddi Katte ..	1,000
London Mission Girls' School, Arlepete ..	700

91. Of grants previously in force the amount of Rs. 60 given to the Cantonment Orphanage, Bangalore, was raised to Rs. 100, to provide for the admission of destitute children who were not orphans.

Anglo-Indian Aid Associations.

92. A donation was made by the Chief Commissioner of Rs. 500 to the Anglo-Indian Aid Association. This is a society formed, as its name indicates, for assisting the poor of the European and Eurasian community, and owes its origin to the inquiries lately set on foot by the Government of India regarding the means of education for these

classes of the population. A similar Association has also been established at Mysore.

93. The operations of the Bangalore Association embraced the following points:—the registration from house to house of the persons requiring aid, with particulars regarding family, income and means of livelihood; the assisting of Ragged Schools; the establishment of an Industrial School, and the placing out with local tradesmen of apprentices. Petitions were presented to Government that the Apprentice Act might be extended to Mysore, and also for the admission of Anglo-Indians into the Army. Inquiries were further made regarding the openings for emigration.

94. The registration above referred to will doubtless be of great use when completed; it is still going on. Of the Ragged Schools, one opened in Shule at the expense of private persons contains 39 boys and girls. To this the Association gives Rs. 20 a month. A like sum is given to Saint Mark's Ragged School, for the purpose of providing a meal a day for poor children. A school for girls established in the Infantry Lines has since been given up.

95. The Industrial School has been established in the Friend-in-need Society's workshop, lent to the Association free of rent for one year. Here there are 11 boys learning, 3 of them smith's work and 8 carpentering, under a European foreman. Besides these, 3 lads have been apprenticed out as shoemakers, 7 as fitters, &c. at iron works, 3 as printers, 2 as stone-masons and 2 as gardeners. The necessity for industrial training was remarked upon in last year's report, and these measures indicate a good beginning made in the right direction.

96. The Mysore Association has established a Night Poor School, which is reported to be doing good.

97. In connection with the education of European and Eurasian children, the following statistics now obtained in this Department are offered as more reliable than any that were previously available. The statement in the margin gives the number of pupils of these class-

	Europeans.		Eurasians.	
	Boys.	Girls.	Boys.	Girls.
Government Schools	22	...	39	...
Aided Schools	276	297	261	199
Military Schools	149	116	65	58
	447	413	365	257

es ascertained to be under instruction in schools directly or indirectly connected with Government.

98. On proceeding to compare these figures with the accompanying statistics obtained at the Census, a difficulty presents itself, inasmuch as the terms *boy* and *girl* have not been used in one definite sense throughout the returns.

	Europeans.		Eurasians.	
	Boys.	Girls.	Boys.	Girls.
Civil	418	505	689	794
Military	421	308	118	116
	839	813	807	910

99. But from a comparison of tables it is evident that they have, as regards these figures, been applied to all minors, that is, all up to and including the age of 20. This is beyond the ordinary period of attendance at school. Making therefore the proper abatement for all below 6 and above 18, the results stand thus. *We have therefore 889 boys and 931 girls of school-going age in the Province, and there are 812 of the former and 670 of the latter known to be under instruction. Of the 77 boys and 261 girls unaccounted for, it may fairly be inferred that the majority are receiving private instruction. For girls especially there are two or three well-known private schools.

	Europeans.		Eurasians.	
	Boys.	Girls.	Boys.	Girls.
*Civil	226	273	372	429
Military	227	166	64	63
	453	439	436	492

100. While treating of this subject it may be worth while to inquire into the details as they affect the cities of Bangalore and Mysore, the only two places on which there are regular settlements of Anglo-Indians, and in each of which an association has been formed for their aid.

101. Calculated on the same principle as the foregoing statements, we ascertain that, within the limits of school-going age, there are altogether 778 boys and 829 girls in Bangalore, and 20 boys and 21 girls in Mysore. The school returns shew 748 boys and 628 girls being taught in Bangaloro, and 18 boys and 19 girls in Mysore. We thus arrive at the result of 766 boys and 647 girls, out of 798 and 850 respectively, under public instruction in both cities. Of the balance, namely 32 boys and 203 girls, there can be no doubt that a large proportion attend private schools, or receive instruction from tutors and governesses at home.

102. In any view of the matter the opinion is confirmed that the

means of education for European and Eurasian children in this Province are not inadequate, as stated in last year's report, though the conclusion is more amply verified by the statistics now presented.

103. The Aided Schools being arranged according to the language which forms the medium or subject of instruction, we obtain the following results:—

Language.	Boys'		Girls'	
	Schools.	Pupils.	Schools.	Pupils.
English	6	363	6	337
Anglo-Vernacular ...	13	1,703	4	320
Kanarese	16	1,180	15	1,201
Telugu and Tamil ...	4	456	4	325
Sanskrit	12	450	...	...
Hindustani ...	26	1,163	2	133

104. The distribution of the schools throughout the Province is exhibited in the subjoined table:—

District.	Boys'		Girls'	
	Schools.	Pupils.	Schools.	Pupils.
Bangalore... ...	38	3,324	20	1,622
Kolar	9	394	...	...
Túmkúr	12	625	3	256

Hassan	5	209	...	...
Shimoga	4	196	1	93
Kadur	...	...	...	...
Chitaldroog ...	1	44	1	35

A. Aided Schools of the Higher Class.

105. *English.*—The number of students at *Bishop Cotton's* is returned as 113, against 141 last year. There has thus been a decrease of 28. The teaching staff continues as previously reported. At the University examinations 2 passed the First Arts out of 3 sent up, and 4 the Matriculation out of 11. The general results of the inspection were good. The following points were

Bishop Cotton's School.

however noted. The boys of the College class were far from ready in answering. Dr. Pope, who himself put the questions, noticed this. The Deputy Inspector reports that the Preparatory Matriculation class were deficient in their knowledge of Euclid, and utterly confused by a change of Euclid's language; that in English the practice of simple composition seemed to require more attention, as the boys had difficulty in expressing themselves neatly and correctly in answering questions; that the first and second classes read badly.

106. With the view of helping this school out of financial difficulties, a grant of Rs. 12,000 was given for purchase of the site, and a loan of Rs. 37,000 on liberal terms sanctioned on the security of the buildings. It is to be hoped that these measures will result in the increased efficiency of the institution.

107. In applying for the grants, the Committee undertook to bring the training of the school within the reach of the whole Eurasian and European community of Bangalore not otherwise provided for. As regards the course of instruction the Government of India insisted upon the imparting of a thorough and accurate knowledge of English and arithmetic, a good knowledge of some local vernacular language, and that habits of self-dependence should be inculcated as far as possible. On the latter point the Committee stated that they did not see their way to introduce industrial training, but that the idea of preparing the pupils to earn their own livelihood was very prominently kept before them; which statement was noticed by Government in the following terms:— "It would seem that the Committee confuse industrial training with the independent habits insisted on. What the Government of India desire is, that the boarders of both sexes should be taught to do without servants of any kind, and that such habits should be inculcated in them as will enable them to rough it in active life hereafter."

Saint Andrew's School.

108. This school contains 67 pupils as compared with 70 last year. Of 9 sent up for Matriculation only one was successful. There have been several changes among the junior masters, and Mr. Thomson, the Head Master, was for some weeks seriously ill. These events have no doubt affected the school to a certain extent injuriously. Former remarks on the character of the

instruction still hold good. As regards Latin, the text books in use are out of date, and inferior to those now generally adopted in public schools. In the second class there was only a grammar. No book had been introduced of exercises for reciprocal translation.

Wesleyan Institution.

109. *Anglo-Vernacular.*—The *Wesleyan Institution*, or, as it has been hitherto called, the Native Educational Institution, had 371 pupils at the close of the year, against 298 entered in last report. A large increase has thus taken place in attendance. Out of 24 candidates for Matriculation, 11 succeeded. The school passed a satisfactory examination at the inspection. The translation of English into Kanarese appeared to have received special attention; but in mathematics there was a want of familiarity with the definitions and theory. In the Geography of India the knowledge was of too general a character.

London Mission Institution.

110. This school had last year 176 students, this year it has 239, which shews a considerable advance in the numbers. Four students matriculated out of 11 sent up. At the inspection all classes did well except the fifth. This failure is attributed to the incompetency of the master in charge. Translation from English into Kanarese was well done, and mathematics throughout the school were up to the standard, though it is questionable whether Euclid and algebra should be introduced at so early a stage as the third class. History and geography had received more attention in the lower than in the upper classes.

Wesleyan School, Mysore.

111. This school shews a roll of 182 pupils against 166 last year. Of 10 sent up for Matriculation 2 passed. The report on the school indicates that steady work is going on.

Saint Joseph's Seminary.

112. There has been an increase of attendance during the year from 156 to 207. At the Matriculation 5 students were presented, of whom one passed. The work throughout the school is good, carried on by an able and hardworking staff.

113. The year has thus been a prosperous one for each of these Anglo-Vernacular schools in Bangalore, and the reverend gentlemen who

have now been at the head of the respective institutions for some time are to be congratulated on the favorable results of their labors.

10,382	10—6—7	752	20	407	1,179

B. Aided Schools of the Middle Class.

114. *English.*—There has been a decrease of attendance at *Saint John's School* from 80 to 60. The present standard of instruction seems to require more adaptation to the wants of the boys who attend the school. It aims too high, and the sub-divisions in the classes are too numerous. The *Ordnance School* has been well conducted by the new master, who appears to be successful as a teacher of young children.

Saint John's School.
Ordnance School.

115. *Anglo-Vernacular.*—The numbers at the *Cantonment School* have considerably increased. The other schools remain at about the same strength, except *Saint Mary's*, where also there has been an increase, due to the admission of day scholars. The inspection reports on these schools are on the whole favorable. The *Jaghirdar's School* has been put on a better footing by the engagement of a competent master.

London Mission Cantonment School.
" Alsur
Saint Mary's Seminary.
Saint Patrick's "
Jaghirdar's School, Yelandur.

116. *Kanarese.*—Under this head are placed two schools belonging to the London Mission, situated at Malur and Anekal; and three Wesleyan

Schools in Bangalore, Mysore, and Túmkúr. The Market Street School, Mysore, and the Fort School, Túmkúr, are both described as the best of their class. The Malur School is believed to have made considerable improvement.

117. *Tamil and Telugu.*—The Chatur-Veda-Siddhanta-Sabha Seminaries continue to be most ably conducted by the Committee composed of native gentlemen. The junior classes are reported to have received special attention.

118. *Sanskrit.*—Of the 12 Sanskrit institutions the most satisfactory are those at Chikballapur, Muttur and Shravana Belgola. I am glad also to report that the Melkote School, the largest of all, has been reconstituted on a promising and efficient basis. This institution ought from its resources and teaching power to take the lead. Pandit Jagannathachari's School at Seringapatam is also favorably reported on. The Bangalore Vidya Nilaya is in a very unsatisfactory state and the Yedatore school has broken down altogether.

119. Attempts are being made to superadd the study of a vernacular language, and of mathematics and geography, to the exclusively literary course pursued at these schools. Instances are common among them of young men highly trained and eminently skilled in the literature, grammar, or dialectics of a dead language, yet unacquainted with the simplest arithmetical rules and operations. Some of the ingenuity expended on the arrangement of complimentary verses in the puzzles of a profusion of *bandhas* would be much better directed if turned to the solution of algebraic problems and the like.

120. *Persian and Hindustani.*—The foregoing remarks apply *mutatis mutandis* to the Persian and Hindustani Madrasas. The language subjects receive every attention, and are in fact the only ones really taught. Students of the very highest classes often do not know how to subtract correctly. Suggestions for remedying these defects have been very willingly received. The Muhammadia and Kudusi Madrasas are reported to be well managed, and in advance of the rest in teaching mathematics and geography. The Sultani Madrasa gives advanced instruction in Arabic and Persian. The Islamia Madrasa is not up to the mark. The Ahmedia Madrasa at Shrinivaspur is favorably mentioned.

3,279	1—10—3	1,479	550	191	2,220

C. Aided Schools of the Lower Class.

Cantonment Orphanage.
Saint Mark's Ragged School.

121. *English.*—The report on the Cantonment Orphanage was not favorable. The books used needed alteration and more method and patience were required in the style of teaching. These matters were brought to the notice of the Committee and some changes have, it is believed, been accordingly made. No report has been received regarding the Ragged School.

Blackpalli Catholic Schools.
Mysore Catholic Schools.
Saint Paul's Schools, Bangalore.
Wesleyan Orphanage, Túmkúr.

122. *Anglo-Vernacular.*—Of the 143 boys in the Blackpalli schools, 73 learn both English and Tamil, and 70 Tamil alone. The school did not do as well as could be wished. A brother from Saint Joseph's has been put in charge with the view of improving it. The Mysore schools, with upwards of 100 boys, are charity schools of a somewhat similar character. Two thirds of the pupils are very young and learning to read. The Saint Paul's schools continue in a very unsatisfactory condition, and it is a question whether the grant-in-aid should not cease. The Wesleyan Orphanage is a very

good school, carefully taught. Several of the boys are in training for mission work.

123. *Kanarese.*—The Wesleyan schools in Túmkúr District appear to be making fair progress. The Shethalli Catholic School on the other hand seems below the standard of our ordinary village schools.

124. *Tamil and Telugu.*—The 18th Hussars' School has now a good building, erected at the expense of the Officers. The school is reported to be doing good in the neighbourhood. The Gun Troop School was inferior to the above. The master's attention required to be more directed to arithmetic. He did not think Long Division of any use.

125. *Hindustani.*—Some of these schools are far from satisfactory. The following however are reported on favorably ; Davangere, Hindiganal, Tyamagondal, Chintamani and Ronur. The Hassan School has been closed altogether by the desertion of the master. At Channapatna a sectarian dispute interrupts all progress. The Húnsúr, Honnali, Magadi and Nelamangala Schools are not what they were. A special effort must be made to remedy this state of things.

Statistical Information.

D. Aided Female Schools.

126. *Higher Class.*—In *Bishop Cotton's School* the girls who attend the college class with the boys gave me the very slightest opportunity of forming an estimate of their attainments, as only one or two ventured, and that rarely, to attempt the answer of a question. The school classes appeared to be making fair progress. Mental arithmetic is reported to have been well done in the first and second classes. The third class was on the whole the best. The Deputy Inspector adds that the importance of teaching domestic usefulness, so far as it can be taught in a school, ought not to be overlooked. The reports on the *Wesleyan School* and the *Convent* are exceedingly favorable. Of the former, the Deputy Inspector says 'I cannot speak too highly of the order and management of the school.' At the Convent dictation was done better than anywhere else, and all the arrangements betokened very careful supervision.

Bishop Cotton's School.
Wesleyan School.
Convent of the Good Shepherd.

127. *Middle Class.*—At the *Saint John's* School the results were not as good as might be expected, considering the number of girls and the staff available for teaching. The arithmetic was generally incorrect, owing perhaps to the use of too many text books. English grammar was well repeated, but the girls could not apply it to the reading books. The Infant School continues very satisfactory. *Miss Fergusson's* School is a well taught one, and of great benefit to the neighbourhood.

128. *Lower Class.*—Of these schools, those connected with the London and Wesleyan Missions in the Petta and Alsur are well taught and carefully managed. The Hindu Female School in the Cantonment is also admirably conducted. The Wesleyan Schools in Túmkúr, Mysore and Shimoga are doing well. So is the interesting school at Chitaldroog, kept by a Lingayat mistress. The Saint Paul's Schools are altogether unsatisfactory. The Hindustani Schools, I regret to say, shew no improvement over last year.

E. Private Unaided Schools.

129. From Deputy Commissioners of Districts and from Missionary Societies returns have been received shewing the existence of 1336 private unaided schools. This is exactly 200 less than last year. The total daily average attendance of pupils is 17,056, against 18,914 as given in the last report. The Hindu schools appear to number 1,260, Muhammadan schools 40. So far as these various figures can be depended on, they shew a decided diminution in the number of indigenous schools. The income from fees is set down as Rs. 43,115, and from other sources as Rs. 455, against Rs. 50,995 and Rs. 3,349 respectively last year, which points in the same direction.

130. The distribution of the indigenous schools may be gathered from the accompanying table, which compares the figures with those of last year. The number has considerably decreased in every District except Bangalore and Chitaldroog, where there is a slight increase.

District.	1873—74.		1874—75.	
	Schools.	Pupils.	Schools.	Pupils.

131. The average number of pupils to each school is a fraction over 12.

VII. BOOK DEPARTMENT.

Stock.

132. The stock of books in the Central and Branch Depôts on the 31st of March 1875 was of the value of Rs. 47,168. There were added to the Central Depôt during the year 34,605 books, at a cost of Rs. 13,055. The number of books supplied to Branch Depôts for sale was 39,084, valued at Rs. 8,913.

Sales.

133. The amount realized by sales of books and paid into Government treasuries was Rs. 18,003 or about the same as last year.

134. The following school books were printed at the Government Educational Press and elsewhere for the Department:—

Vagvidhayini, Kanarese Grammar	10,000
Treatise on Small-pox, English and Kanarese	1,000
Second Book, English	500
Graduated Translation Exercises, Part I, English-Kanarese and Kanarese-English	5,000

The right of bringing out an edition of the last named for use in this Province was purchased from Mr. Stapley, late of Allahabad. The work was one much needed, and its use will, I trust, effect an improvement in the system of teaching English to natives.

135. The books purchased for the Department during the year were as follows:—

Jaimini Bharata	110
Channa Basava Purana	40
Raja Shekhara Vilasa, Part III, with *Tika*	30
Ramayana	10
Pancha Tantra	10

Telugu First Book	400
„ Second Book .. .	50
Morris' History of India, Kanarese ..	100
Do do Telugu ..	50
Hanumad Vilasa	100
Naga Varma's Chandas ..	250
Maps of the World, Urdu ..	30

VIII. LITERATURE.

136. The analysis of works registered in this Province in 1874 was separately submitted in due course. The comparative statement in the margin will shew that the total number entered was nearly double that for the previous year. Of the publications 2 were in English, 39 in Kanarese, 1 in Telugu, 7 in Hindustani, 8 in Sanskrit (with Kanarese translation or notes) and one in Persian.

137. The work under the head of biography is a life of Kabira Dása, a religious mendicant who lived in the time of Akbar, and used to travel between Seringham and Seringapatam accepting alms and feeding all who came to him. The works classed as dramatical are all based upon episodes of the Maha Bharata, composed as *yaksha gána* for public performance. With one exception the stories are connected with fighting. The medical work is an edition of Dr. Conquest's Outlines of Midwifery, with translation in Kanarese, under the title of *Sútika Sástra Sangraha*, by Arokyam Pille. The religious works include *Christa Sabhe Prárthane*, a Christian Liturgy in Kanarese ; and *Brahmánanda Sataka*, hymns of the Brahmo Samaj, also in Kanarese.

IX. SCHOOL BUILDINGS.

138. The taluk school houses at Hole Honnur and Tarikere were completed by the Public Works Department, according to the second class standard design. The long looked for building at Húnsúr was commenced. This will be on the first class plan.

139. Many of the schools are carried on at a great disadvantage owing to want of suitable premises. Arrangements were therefore made for the erection by this Department of a certain number every year, which will add greatly to the permanency of the improvement which has taken place during the past year.

140. Repairs were carried out to 18 school houses at a total cost of Rs. 3,408. The amount of the estimates varied from Rs. 553 to Rs. 27. The school grounds at Chitaldroog, Nyamti, Kolar and Magadi were enclosed and levelled at an expenditure of Rs. 295.

141. The building grants given have already been mentioned under aided schools.

X. CONCLUSION.

142. The remoter parts of the Kadur Malnad and the south of the Mysore District were visited by me in the cold weather. The former inaccessible region is now being opened up so thoroughly for traffic that inspection will no longer be a matter of difficulty, and I found a strong desire prevailing among those with whom I came in contact for schools. But more especially for English instruction, which is not to be wondered at in connection with the general settlement of European coffee planters in those parts. Applications for aid to Sanskrit and Muhammadan schools, which are of course semi-religious in their character, are very frequent.

143. I would take the opportunity of again recording my sincere thanks, and that of the Department generally, for the personal interest at all times manifested in school proceedings by Sir Richard Meade, Chief Commissioner; and, during his absence from this Province, by Mr. J. D. Gordon, C. S. I. and the Honorable Mr. Dalyell, officiating in that appointment.

144. To the various Officers of the Administration, who have ever been most willing in rendering assistance to the work of education within the range of their respective jurisdictions, we are much indebted.

145. The services of the Inspectors, Principals and other executive and instructional members of the Department, as brought to notice in various parts of this report, are entitled to my best acknowledgments.

I have the honor to be
Sir,
Your most obedient Servant,

L. RICE,

Director of Public Instruction,
Mysore & Coorg.
